CARE WASH MANAGEMENT PRACTICES

	Initial Below
Applicant agrees to maintain copies of material safety data sheets for each chemical used in the course of their business and will keep a copy of each chemical at the point of use (i.e. kept on the truck, storage area and in the office).	
Applicant agrees to follow chemical label requirements for safe and proper use, and disposal.	
Applicant understands that to dispose of wash water with cleaning agents, soaps, detergents or biocides to curb drains, storm drains, ditches or canals is prohibited under City ordinance.	
Applicant agrees to secure all chemicals, fuel and fuel containing equipment during transport to prevent their spillage to the City stormwater system.	
Applicant understands that if wash water contains cleaning agents, soaps, detergents or biocides the applicant will be required to contain and vacuum all washwater to prevent its discharge to curb drains, storm drains, ditches or canals.	
Applicant has read the City Stormwater Management Code cited below.

Code of Ordinances City of Savannah

CHAPTER 11. STORMWATER MANAGEMENT

Sec. 4-11004. Restrictions and limitations on the use of the city stormwater system.

The primary purpose of the stormwater system is the conveyance of stormwater and other permissible discharges as outlined in section 4-11027.

- (1) No person shall discharge, spill, or dump substances or materials which are not entirely composed of stormwater or discharges otherwise exempted in section 4-11027 of this chapter into the city separate stormwater system or onto driveways, sidewalks, parking lots, streets, or other areas that discharge into the city separate stormwater system.
 - (2) It shall be unlawful for any person to maliciously, willfully, or negligently break, damage, destroy, uncover, deface, modify, or tamper with any stormwater structure, appurtenance, or equipment.
 - (3) It shall be unlawful, without prior written approval of the director, to alter in any way any part of the stormwater system including, but not limited to, rerouting, removing, deepening, widening, enlarging, filling or obstructing any part of the stormwater system including fencing easements and rights-of-way which render the system inaccessible to equipment necessary to perform maintenance and repairs.
 - (4) It shall be unlawful for any person to connect any pipe, open channel, or any other conveyance system that discharges anything except stormwater or exempted discharges listed in section 4-11027 of this chapter to the city separate stormwater system. Illicit connections will be disconnected and redirected to the city sanitary sewer system upon approval by the water pollution control director, at the expense of the responsible person.
 - (5) It shall be unlawful to increase stormwater quantity discharged to the city separate stormwater system without an accepted stormwater management plan.
- (Ord. of 12-7-1995(1), § 1)

Sec. 4-11029. Accidental discharge reporting requirements.

In the event of an accidental discharge to the city's separate stormwater system of any material or substance other than stormwater runoff or those discharges specifically excluded in section 4-11027, the stormwater department shall be contacted immediately of the nature, quantity and time of occurrence of the discharge. The responsible party shall take immediate steps to contain, treat or to otherwise minimize effects of the discharge on the city's system and receiving streams. Immediate steps shall be taken to ensure no recurrence of the discharge. A written report addressed to the director of stormwater management detailing the date, time, cause, quantity, and characteristics of the discharge and the corrective and preventative actions taken will be sent to the director within five working days of the incident.

(Ord. of 12-7-1995(1), § 1)
