

COS THERAPEUTIC RECREATION PROGRAM

The Therapeutic Recreation Program is a division of the City of Savannah Recreation & Leisure Services Department, which provides recreational activities and opportunities to improve fitness, health, and well-being for intellectually and physically challenged citizens.

Both youth and adults participate in cultural and athletic activities as well as special events and annual Special Olympics competitions.

Our staff is dedicated to maintaining an atmosphere that promotes leisure awareness, social interaction, and personal achievement.

Activities are free and occur quarterly. Some transportation services are available to citizens that live within the city limits of Savannah as a part of the Savannah First Initiative.
